

# *Aerialite<sup>®</sup>* *sets new heights in* *board technology.*

Since its inception, Aerialite<sup>®</sup> fabrics have raised the bar for high-performance surf glass. The only fabric developed by board builders, Aerialite took two years of research and development to perfect. The result is a fabric that ensures the high-quality look and finish that surfers expect.

Aerialite displays improved wetout and clarity, which increases laminate strength and provides a smoother, whiter surface.

It's strong, durable and lightweight—providing superior handling and cleanliness to ensure smooth, trouble-free manufacturing.

Aerialite is available in various styles—each offering the unique physical properties to meet your meticulous production standards.

Aerialite is readily available because every yard of Aerialite is manufactured in the USA.

Style	Widths	Construction	Weight
1521	25", 27", 30"	30 x 18	4 Oz. Warp Enhanced
1522	25", 27", 30"	24 x 22	4 Oz. Standard
7537	25", 27", 30"	18 x 22	5 Oz. "6/4 Combo"
7533	27", 30"	18 x 18	6 Oz. Standard
7534	27", 30"	24 x 14	6 Oz. Warp Enhanced
